ABSTRACT

Providing both educational and social experiences for trainable mentally retarded (TMR) children, the curriculum guide covers three educational levels: primary (6-8 year olds), intermediate (8-13 year olds), and secondary (13-21 year olds). Indicated in chart format for each general area of instruction are specific behavioral objectives, experiences and activities to achieve those objectives, and suggested instructional materials and resources. General areas covered in the primary curriculum are social skills, self care skills, gross and fine motor skills, auditory perception, language arts, math, music, and art. The intermediate curriculum includes communication skills, personal and social competence, physical development, economic usefulness, safety, recreation, manners and morals, and self help skills. Covered in the secondary curriculum are motor skills, safety and self care, social skills, language and communication, functional math, vocational skills, recreation, and aesthetic appreciation. Evaluation charts conclude each of the three levels. (KW)

Curriculum Guide for the Trainable Mentally Retarded in Primary, Intermediate and Secondary Curricula

This curriculum guide was prepared by Duquesne University and represents an endeavor encompassing results of three years of summer traineeship programs sponsored by the university and funded by the Department of Education Federal funds Part D, P.L. 91-230. It is being distributed to selected educators in the field of Special Education for information and possible use in structuring programs for trainable mentally retarded children. No further distribution will be made, nor will additional copies be disseminated from the Department of Education.

Foreword

For the past three summers (1969, 1970, and 1971), Duquesne University has been privileged to offer an Institute for Teachers of Trainable Children. This educational endeavor has been made possible by a series of federal grants from the Pennsylvania Department of Education under Part C, Public Law 91-230 as amended. Nearly one-hundred students have participated in these Institutes which have been concerned with the very important and frequently-neglected aspect of mental retardation—the education of trainable children. This Guide, which has been developed by faculty and students at Duquesne University as a result of the combined Institutes, will hopefully be shared with teachers and others who have an interest in this aspect of Special Education.

We are most indebted to the professional personnel of the Bureau of Special Education at the State Department and thank them for their leadership and assistance in the development of the Institutes. Most particularly, we express our appreciation to Dr. William F. Ohrtman, Director of Special Education, to the late Vera Fairer, to Marion Lohr, formerly with the Bureau of Special Education, and to Joseph N. Lantzer and Russell P. Demanczyk, program supervisors within the Bureau of Special Education.

Preface

For many years the child diagnosed as mentally retarded trainable has missed many invaluable opportunities that could and should have provided the necessary educational and social experiences which would have made him a more productive, self-reliant and independent contributor to society.

To increase the educational and social experiences of the mentally retarded trainable, and to provide a systematic approach in curriculum planning, the preparation and publication of this guide was undertaken.

Many discussions of information, involvement in research activities, and the implementation of suggestions identified as extremely relevant to the development of an up-to-date curriculum guide was carried out. These activities permitted a broader understanding of all areas related to the management of the educable mentally retarded. Interaction between professionals, teacher trainees and others were structured to permit an exchange of ideas, needs and concerns about the essential training of the trainable child.

The content of this curriculum guide is twofold: it is designed to facilitate the learning process in teacher-child relationships in structured educational environments, and to provide methodologies that will have positive influences on the educational direction of the trainable mentally retarded.

The culmination of these intentions will be the provision of opportunities for the development of maximum skills for the mentally retarded trainable so vitally important for meeting the demands of everyday living.

Sincere appreciation and recognition is given to the academic faculty members at Duquesne University and to the summer traineeship teachers whose dedication and involvement made the publication possible.

Introduction

The American Association on Mental Deficiency refers to mental retardation as sub-average intellectual functioning which originates during the developmental period and is associated with an impairment in adaptive behavior.

On an intelligence scale, the mentally retarded would be those who have an I.Q. of approximately 75 and below. This curriculum is concerned only with the Trainable Mentally Retarded. These children are found on the I.Q. scale at 50 or below.

In developing this curriculum, the I.Q. scores are used not as a sole indication of intelligence, but as a guide to the approximate mental levels of trainable youngsters.

Unlike the "normal" child, a trainable retarded child's mental age is at least half of his chronological age (C.A.); and on this lower level of the scale, this is a significant factor in the development of activities and programs.

The curriculum has been divided into three areas: Primary C.A. (6-8); Intermediate C.A. (8-13); Secondary C.A. (13-21). The divisions have been made in accord with State regulations in regard to homogeneous grouping.

Basically, a curriculum guide is a foundation for any educational or training program,

and it has to serve the ends which are designated by society. It must primarily take into account the society to which the participating youngsters belong. At all times, their function in this society will be determined by their intellectual, vocational, and social potential.

In essence, then, a curriculum guide is a guide which will attempt to correlate the needs of society with the needs of the individual, taking into consideration the capacity of the latter.

It cannot be too strongly stressed that no curriculum is static. In order to be meaningful, it must be dynamic and should be ready to change whenever the expectations of the particular society change, as well as when a change occurs in the particular environment.

Children are human organisms and, therefore, are unique both physiologically and psychologically. In our democratic society, it is felt that all children are entitled to an education within their capabilities. Their uniqueness demands equal but not necessarily identical opportunities. The mentally retarded child, because of his intellectual limitations, cannot profit from the opportunities offered to the normal or average child. Therefore, it is felt that a curriculum suited to the needs of the mentally retarded child must be devised.

The term "trainable" will refer to the child or children meeting the following criteria:

- For school purposes, a trainable child is one:
1. who is of school age;

2. who is developing at the rate of one-third to one-half that of the normal child (I.Q. on individual examinations roughly between 20-50) ;
3. who, because of retarded mental development, is ineligible for classes for the educable mentally retarded who will, however, probably not be custodial, totally dependent, or require nursing care throughout life;
4. who has potentialities for self-care tasks and who can learn to protect himself from common dangers in the home, school, or neighborhood;
5. who has potentialities for social adjustment in the home or neighborhood and can learn to share, respect property rights, cooperate in a family unit and with neighbors;
6. who has potentialities for economic usefulness in the home and neighborhood by assisting in chores around the house, or in doing routine tasks for remuneration in a sheltered environment under supervision—even though he will require some care, supervision, and economic support throughout his life.

It is further recognized that some of these children have multiple disabilities, but that the mental retardation has been judged to be the major disability. In these situations, it is felt that the child can best profit from the experiences offered to the trainable.

Primary Curriculum

SOCIAL SKILLS

GENERAL OBJECTIVE:

The child should demonstrate adequate internalization of social skills to successfully exist in a semi-protective environment.

SPECIFIC OBJECTIVES	EXPERIENCES AND ACTIVITIES	RESOURCES
<p>The child should be able to verbally associate objects with their names.</p>	<ol style="list-style-type: none"> 1. Choose an object with a one-syllable name. Hand it to the child. Say the name of the object such as a "doll" or a "ball". Hand the object to child and repeat the name. Put the object in the child's hand if he shows no curiosity. Use several objects in the course of several days. 2. Interest the child in a toy or animal he may have shown interest in. Allow him to play with the toy or animal and repeat the name of the object clearly and distinctly. 3. Pass around to children seated in a circle a bowl of fruit. Pick out a piece of fruit, name it, and allow the children to pass it around. The children should each repeat the name of the fruit. 	<p>Toys, such as blocks, stuffed animals. (See Language Arts)</p>
<p>The child should demonstrate an awareness of other children. (This would necessarily develop after adequate work had been done on the child's body image and self-concept.)</p>	<ol style="list-style-type: none"> 1. Show the child a full length mirror and have him identify himself. Next introduce another well-adjusted child into the mirror and ask the second child to state his name. Have each identify himself and then the other child by pointing to the mirror reflection. 2. Physically communicate with the child and introduce him to another child while both are dressed in certain social roles such as Father and Mother. 	<p>Peabody language kit.</p> <p>Full-length mirror.</p> <p>Old clothes that would include hats, high heels, purses, ties and long dresses.</p>

SOURCES

<p>The child should be able to communicate with another child.</p>	<ol style="list-style-type: none"> 3. Verbally direct the child to bring a simple object to another child such as a toy, paper, or a cup and to try and use correct social responses. 4. Have an older child sing a song that names the members of the class individually. 1. Separate the two children by a visual barrier. Connect the phones electrically and allow the children to speak to each other briefly. 2. Send the children back together with play phones within hearing distance and allow them to again converse for the length of their attention span. 3. The teacher should feign ignorance of the child's request and ask another child to ask the first child for an explanation. 4. Pair poorly-adjusted and well-adjusted children together. Do not allow the well-adjusted children to compensate for the problems and possible handicaps for the poorly-adjusted child. 5. Physical communication such as gestures and body language should be discouraged in each verbal child. Always make the child say what he wants or needs without too much attendant frustration. 	<p>Any small object, preferably napkins or some object associated with eating.</p> <p>"He Has the Whole World in His Hands"</p> <p>Bell Telephone Company Trainer (Public Relations Department)</p> <p>Play phones</p> <p>Certain desk arrangement in the classroom.</p> <p>Close supervision by teacher or aide is necessary.</p>

SOCIAL SKILLS

SPECIFIC OBJECTIVES	EXPERIENCES AND ACTIVITIES	RESOURCES
The child should be able to play by himself without interaction.	<ol style="list-style-type: none"> 1. Put two children in a quiet corner of the room. Use room dividers to partially isolate the two youngsters. Give each child a similar activity to perform. The teacher should supervise closely the activities and will at this point present the concepts of "my puzzle" and "his puzzle". Compliment a specific point about each child's work and draw it to the attention of the other child. Allow the children to exchange materials. 2. Give the children many changes to play or work side by side. 	<p>Room dividers (preferably waist-high)</p> <p>Puzzles</p>
The child should be able to play or work with other children.	<ol style="list-style-type: none"> 1. Use the activities suggested by the previous objective and build to it. Introduce a third child, a fourth, and more children to these types of activities. This will develop readiness for work in a group situation. 2. Develop small situations for role playing. Allow the child to imitate an authority figure such as the teacher, a father, or a policeman. One should be careful not to allow a domineering child to play the leading role too often. 	<p>Toys, puzzles.</p> <p>Looking at books.</p> <p>Watching television</p> <p>Listening to records.</p> <p>Tea parties.</p> <p>Pointer</p> <p>Hats</p> <p>Stop sign</p> <p>Safety patrol belt</p>

SOCIAL SKILLS

SPECIFIC OBJECTIVES	EXPERIENCES AND ACTIVITIES	RESOURCES
The child should be able to take turns.	<ol style="list-style-type: none"> 1. Place a colored marker on the floor with the specific child's name printed on the marker. Have the children leave their seats and stand on their name. Reward those who perform correctly. Use this method for teaching the class to stand in line. Taking turns can be easily drawn from this activity by allowing one child at a time to perform a task such as running a race or lining up to use the lavatory. 2. Start a game where the children and the adults use the songsong phrase "my turn" and "your turn". Reinforce this idea and expand it by including other children into the game. 3. The teacher should compliment children who are waiting to take their turn. Allow the children to tell who has taken a turn and who has not. 4. Activities that reinforce the concept of taking turns are: <ol style="list-style-type: none"> a. Show and tell activities; b. Feeding pets in the room; c. Watering plants; d. Passing out and collecting work materials such as paper scissors, crayons, cookies, etc.; and e. Mopping the floor, dusting shelves, erasing blackboard. 	<p>Large sheets of colored paper.</p> <p>Small edibles or toys and operant conditioning technique</p> <p>Matching picture cards.</p> <p>Teacher</p>

SOCIAL SKILLS

SPECIFIC OBJECTIVES	EXPERIENCES AND ACTIVITIES	RESOURCES
<p>The child should be able and willing to share with others.</p>	<ol style="list-style-type: none"> 1. This should first be tried with someone the child is close to such as a parent or sibling. Allow the child to hold a book while the adult reads a story. Use the phrases such as "let's do this together" and "let's share the book together". 2. Expand this by arranging the child to have something to share with another child who does not have it. Encourage the child to share it and verbally reinforce his actions. 3. Next allow the child to share with more than one person. Ask him to pass out cookies to each one. Instruct the child to make sure that each student has some. 4. Have the children make a gift for a specific occasion for one person such as making Christmas cards or coloring a picture for their parents. 5. Plan a party and have the children prepare simple foods such as Shake-a-Pudding or Instant Breakfast with the idea in mind of both sharing the activities and the refreshment with another class of children 	<p>Parental cooperation</p> <p>Book</p> <p>Cards Cookies Toys</p> <p>Shake-a-Pudding Milk Instant Breakfast mix.</p>

SOCIAL SKILLS

SPECIFIC OBJECTIVES	EXPERIENCES AND ACTIVITIES	RESOURCES
<p>The child should respect the property of others by not destroying it.</p>	<p>1. Whenever the child destroys some object, withdraw all possible adult attention from him. Allow the child to work with clay, wooden puzzles, or some other energy consuming activity. The child should have his excess energy channeled into nondestructive activities. As a safety precaution, give him nondestructible play and work materials whenever possible. Gradually introduce materials that can be destroyed with little loss of value such as paper work. It is possible to condition the child negatively by withdrawing attention, but positive reinforcement is more valuable. (Use of edibles, etc.)</p>	<p>Teacher and aide. Clay and a clay board. Wooden puzzles. Taking walk Kicking ball</p>
<p>The child should cooperate with other children most of the time.</p>	<p>1. For immediate reward, let the uncooperative child be assigned to help some other child who may be lacking in a certain skill. ("Buddy system.") Allow the two to eat lunch together, for example, and one be partly responsible for the other child.</p> <p>2. Assign both youngsters to the completion of a small object such as dusting shelves or rolling rugs. Teacher and aide should verbally reinforce both children with specific compliments as much as possible.</p>	<p>Newsprint and crayons. Chalk Sponge rubber materials from Constructive Playthings, Inc. Dust clothes Small scatter rugs</p>

SOCIAL SKILLS

SPECIFIC OBJECTIVES	EXPERIENCES AND ACTIVITIES	RESOURCES
<p>The child should be able to participate in both large and small groups.</p>	<ol style="list-style-type: none"> 1. Begin by stressing the composition of the class and their own special groups, for example, "Only good girls and boys are in this room." 2. Mount pictures that show children working and playing together in a small group. Tell stories with the poster to further reinforce the group idea. 3. If the child has a good deal of trouble relating to group situations, pair him with a more sociable partner. Gradually increase the size of the group to four or five. 4. Have the children engage in physical activity that would reinforce the group concept such as aquatics and rhythm exercises. 5. Have the class responsible for completing one large task such as painting a mural with adequate supervision. 	<p>Teacher</p> <p>Pictures Candid photographs</p> <p>Sociometric grouping.</p> <p>Music Swimming pool</p> <p>Large amounts of newsprint Paint, brushes or sponges</p>
<p>The child should be able to assume responsibility for the completion of small tasks most of the time.</p>	<ol style="list-style-type: none"> 1. This should begin with very small jobs that can be completed immediately upon the teacher's request. Small jobs can be passing out paper, arranging chairs, opening windows, or sweeping the floor. 2. Next, have the children be responsible for duties that must be taken care of daily, such as watering the plants, feeding the fish or turtles, hanging up wraps, emptying the wastebaskets, and sweeping the floor. Remind the child if he has forgotten his job, but never scold or nag him. 	<p>See activities</p> <p>Helper chart</p>

SOCIAL SKILLS

SPECIFIC OBJECTIVES	EXPERIENCES AND ACTIVITIES	RESOURCES
The child should display acceptable table and social manners.	<ol style="list-style-type: none"> 1. Use the presence and absence of food as a reinforcer in this situation. Introduce the child to the spoon if this has not already been done. Teach the child on a close individual basis to use the spoon; take away her food every time she resorts to using fingers or licking. 2. After this rudimentary step is accomplished introduce the fork and possibly the knife using the same type of reinforcement. 3. Replace the bib with a napkin around the neck. Also make the child aware of general sloppiness. 4. The class as a whole should be exposed to "Please," "Thank you," and "Excuse me," from the very beginning. Ask the child to use these minimal forms of courtesy for lunch and for juice breaks. Much prompting will be necessary for the child to assume these manners as habit. 	<p>Long bibs, chewable food, spoon.</p> <p>Fork and knife.</p> <p>Paper napkins.</p> <p>Juice and crackers.</p>

SELF-CARE SKILLS

GENERAL OBJECTIVE: Independence in Self-Care Skills

The methods used in teach self-help skills are of utmost importance, because the child must not experience too many failures. The following principles must be followed in the self-care training program:

1. Be aware of the knowledge of child's level of development and the way he learns best.
2. Provide learning experiences that are pleasant.
3. Teach each child the skill the simplest way and in stages, one step at a time. Analyze each skill, breaking it down into very small steps. Teach the easiest part first.
4. Give the child ample time and opportunity to work on a new task.
5. Be consistent. If a child is expected to brush his teeth one day, he should do so every day.
6. There should be a realistic motivation.
7. Give encouragement and praise for effort.
8. Don't expect perfection. Mistakes and accidents are common. Although mishaps cannot be ignored, they need not cause dismay. Do not become too concerned if a child shows no progress in a self-help activity within a reasonable length of time. Don't worry about each failure; there will be many things these children will not be able to learn in spite of the best efforts of the teacher and the child's desire to please.
9. Be flexible. If one method doesn't work, try another.

Arts and crafts can become an integral part of the school program for the Trainable Mentally Retarded. Through a balanced and multi-media approach, a number of general objectives can be achieved. Each activity by its very nature would provide an outlet for emotional release, an opportunity for manipulation, an improved self-concept, a basis for establishing acceptable habits of work, and promotion of social growth. We have arranged the activities according to the various media used and by their range of difficulty.¹ Since each activity carries with it overlapping specific objectives, we have coded the objectives in the following manner to avoid repetition:

1. To develop large muscles.
2. To develop fine muscles.
3. To develop eye-hand coordination.
4. To expand the tactile experience.
5. To develop overall coordination.
6. To experience kinesthetic sensation.

Intermediate Curriculum

COMMUNICATION SKILLS - INTERMEDIATE LEVEL

GENERAL OBJECTIVE: To Develop Listening Skills

Specific Objective	Experiences and Activities	Resources
Demonstrate awareness of sound.	I. The child should at intervals be given an informal test to determine whether he is aware of sound.	I. Any sudden noise loud enough to make the child jump. Songs which include his name. Music boxes to crank.
Develop acuity.	1. A responsive child is asked to find a bell which the teacher or aide rings. Gradually include more reluctant children; change noise maker; let children begin to control noise maker; blindfold child as confidence increases; blindfold entire group, working in well cleared space. Use animal sounds, hand clap, etc.	1. Bells, drums, whistling toys, toy locomotives - anything which is available in classroom or on playground.
2. Differentiate and simply indicate change in pitch, loudness and softness.	2. Use any available instrument. Strike high and low notes. At the time a note is struck, say the proper word - high, low, loud, soft. With high ask children to stand with arms high. With low, ask them to bend low. (This overlaps physical education and spatial awareness.) If necessary, use flexible dolls or pipe cleaner figures to develop concepts of position. Extend this activity.	2. Advantage, Raymond Fournier and Vincent Presno Prentice Hall, Inc. Communication Skills, Beaver County Special Pupil Services Beaver, Pennsylvania

Specific Objective	Experiences and Activities	Resources

(Paper being torn, water poured, stick broken, maracas, jingle bells, etc.) If child does or does not have speech, actual objects and materials may be available for him to point out. Later, flocked pictures, felt cut-outs, and ordinary pictures may be used. Game: I Hear Something. (Listening and observing) "Be very still and listen. Can you hear the wind?" Birds, trains, airplanes, etc. provide opportunities for this game.	1. Teacher makes the sound n-n-n. Children make the sound. Teacher says word containing the sound. Children respond with yes or no if speech is inadequate. Later the teacher should interject words which do not contain the sound. Fun and rapport are the secrets of this activity.</p> <p>6. The teacher can write the words on the chalkboard if they "fit." If the children experience too much difficulty, keep repeating the sound for them. Getting a word placed on the board is sufficient reward. 7. Recognize and indicate words that rhyme.	7. The teacher says pairs of words which do or do not rhyme. The children give a yes or no response. Developmental work for this skill should include reading of familiar rhymes, pausing to let children supply the rhyming word. Language Master may be used for reinforcement with pictures of objects whose names rhyme and with words recorded.	7. Children are rewarded if they can repeat and make "word songs."	8. <u>Michigan Language Program</u> <u>Listening Script Book</u> Smith and Smith Learning Research Assoc., Inc.

GENERAL OBJECTIVE: To Develop Gesturing as a Communication Skill

Specific Objective	Experiences and Activities	Resources
Use large motor gesturing skills appropriately and with pleasure.	I. Act out simple charades: brushing hair, waving, eating, brushing teeth, driving bus. Imitate actions of individuals or animals known to the child. Learn and repeat gestures with a song or poem. Stand properly for the Star Spangled Banner. Imitate a rhythm given by another person (clap, clap, pause, clap). Clap and/or march to music. Increase the difficulty of the patterns and rhythms. Let a child direct the others as they sing. <u>Pantomime Nursery Rhymes</u> and familiar stories while teacher or aide reads. Perform exercises with and without equipment. Use fine motor skills in gesturing.	II. Begin by making faces - funny, mad, happy, scared, etc. Develop the use of this skill in dramatics. Use fingerplays. Game: Statues Use all kinds of action songs. Game: Changeable Charlie (interchangeable features) can be purchased or teacher-made. The teacher can describe a situation, as "Our Mother gave you a dish of chocolate pudding. Would you look happy or sad? Show us." One child can show and others describe how he feels.	II. GENERAL OBJECTIVE: To Develop Visual Skills

Specific Objective	Experiences and Activities	Resources
Demonstrate visual acuity.		
1. See in focus at reasonable distance.	1. Give the child a pointer such as a yardstick. Place a candy on a flat surface. Let him try to touch with the stick. Success in two tries gets the "goody." Watch his eyes for squinting or closing one. Put a pin of a familiar animal on your dress. Face the child. Ask, "What do I have on my dress?" Point to the pin. Project a picture out of focus. Bring into focus. Ask, "What is it?" Object must be somewhat small and very familiar. Use pairs of simple identical pictures (cut from old reading books or magazines) mounted on cardboard. Hold up one and ask child to walk to chalk tray and select one just like it. Observe his procedures.	1. Pointers, yardsticks, candy Slides Film strips Pairs of pictures which are identical. Inexpensive pins of animal shapes.
2. See in focus at distance required for reading and other desk work.	2. Observe child as he counts dots. If his finger does not hit the dot, suspect acuity. Practice with larger objects spaced farther apart, and then go back to dots. Ask the child to put a needle through the holes in a button. If other motor skills are good and he cannot hit the holes, suspect acuity. Discuss faces of children in pictures and observe whether the child sees smile, frown, etc.	2. Attach pictures or actual objects to chalk board with tape in widely separated positions (5 or 6 feet horizontally and height of chalk board vertically). Sit facing the children. Say, "Look at the ball; look at the box; look at the car, etc." This is fun and can be repeated many times. Suspend a ball. Start it swinging. Child taps it gently each time it goes past. COMMUNICATION SKILLS - INTERMEDIATE LEVEL

GENERAL OBJECTIVE: To develop communication skills through tactile, kinesthetic, gustatory, and olfactory means.

Specific Objective	Experiences and Activities
Recognize through touch alone.	The child practices tracing geometrical forms with finger while eyes are closed and naming the form. The teacher can incorporate into this activity concepts of same-different, big-small, hard-soft, how many, heavy-light, long-short, smooth-rough, hot-cold. Common objects may be put into a bag. The child puts his hand in and names the objects or describes them as he feels them. The teacher asks the child to close his eyes. She then touches his arm, knee, chin, shoulder, asking him to identify the part touched each time.
Recognize familiar figures from tracing.	Trace shapes in heavy cardboard, wood, wire, or plastic. After the child has done this several times, the teacher traces one of the shapes on his back. He identifies the shape - verbally if possible.
Identify odors.	Begin with odors of common things like onions, cooked bacon, etc. Increase difficulty, and develop this as a source of enjoyment. The fragrance of flowers, freshly cut grass, spices, fresh bread, and pine are a few suggestions. Odors of dangerous materials may be included in safety education.
Identify materials by taste.	Begin with materials such as sugar, salt, orange juice, butter, and jelly. Develop this skill as far as possible, but use caution. The children may want to try paint, detergent, etc.

CRAZY-QUILT AFGAN

Material: Spinnerin Marvel Twist Yarn Squares can be made in any color and put together to suit the maker.

Make 48 squares.

Cast on 32 stitches. Work in stockinette stitch for 42 rows - about 7 inches or until a square is formed. Bind off.

Sew the squares together in rows of 8. Then sew 6 strips together. Attach fringe at top and bottom.

If the child has only accomplished knitting, then do the squares in all knitting or garter stitch. If the child is more accomplished, some of the squares may be patterned. Several children may work on one afghan if we make sure that all the squares come out the same size.

RIBBED CAP

Cast on 72 stitches. Rib in k 2, and p 2, for 11 inches.

Row 1 - K 2 tog., repeat across the row.

Row 3 and 4 - Same as Row 1. Break yarn, leaving about 24 inches. Thread yarn through blunt end tapestry needle and run through stitches on knitting needle. Draw stitches together tightly. Fasten securely. With fingers or crochet hook, make a chain. Make a tassel on a 2 inch cardboard. Join tassel to one end of the chain. Join the other end of the chain to the top of the hat.

FUNNY FACE CAP

Materials: 2 oz. Fleishers Four Seasons Yarn. 1 pr. size 11 knitting needles

Gauge: 3 stitches + 1 inch.

6 rows (3 ridges) = 1 inch.

Measure off 45 inches from the end of the yarn, and cast on 32 stitches. Do not break off the end of the yarn. This will be used later as part of the braided tie string. Knit every row for 52 rows. Bind off. Break yarn leaving a 15 inch end for the braided tie string. You will have 27 ridges on the right side including the bound off edge.

Tie Strings Cut one strand of yarn 30 inches long. Draw through corner at end of bind off row. Pull ends even. Braid these three strands for 10 inches. Tie ends in a knot. Trim ends for a tassel. Cut 1 strand of yarn 28 inches long. Draw through the corner of the cast on row. Braid for 12 inches, together with end of yarn left at this corner. Block.

Use small pieces of colored felt or silk to applique for face on back of cap.

Tassel: Wind the remaining yarn on a piece of cardboard 3 inches wide. Tie at one end, leaving an end of yarn to sew to cap. Cut the other end. Tie again, 3 inches below tied end.

Trim ends of tassel even. Sew tassel to the front of the cap. Turn front corner back over the cap and tack.

STRETCH TV SLIPPERS

Materials: 1 pr. No. 8 knitting needles 2 oz. Sears Petal, Delight or Empress yarn.
Cast on 28 stitches. (heel)

Knit every row until the piece measures the length of your foot. Break off the yarn leaving an 8 inch end. Thread yarn into a tapestry needle, and slip the stitches from the knitting needle onto the tapestry needle. Pull stitches up very tightly and fasten securely. Sew the edges together for 2 - 4 inches above the drawn up stitches, to form the toe. Fold cast on edge in half and make a seam for center back.

MAN'S SCARF

Size: 7 inches by 40 inches

Materials: 4 oz. skein knitting worsted 1 pr. size 8 knitting needles

Cast on 34 stitches. Knit every row until the piece measures 40 inches. Bind off.

Fringe: Wind yarn around a 2 1/2 inch cardboard. Cut strands at one end. Fold and knot

2 strands in every other stitch across each end of the scarf.

TASSEL BONNET

Materials: 1 pair of number 8 knitting needles 2 oz. Sears Petal, Delight or Empress yarn

Gauge: 4 1/2 to 5 stitches = 1 inch.

Cast on 35 stitches. This will be 7 or 7 1/2 inches. Knit every row until you have a rectangular piece which measures 14 or 15 inches long. Sew short sides together. Fasten one end together making 3 loops. Make three tassels and fasten at joining.

HOUSE SLIPPERS "A GO-GO"

Either corner, heel or toe ----- tie them on and go --- go.

On number 6 needles, cast on three (3) stitches. Knit one row. Next row: Knit 1, inc. 1 in the next stitch, knit 1. Third row: K. 1, inc. 1 stitch in the next stitch, K. 2. You now have 5 stitches on the needle. Knit every row until work measures 5 inches. Next row: (repeat this row until there are 21 stitches on the needle). Increase 1 stitch in each one of these 21 stitches. (42 stitches on needles) Work on these 42 stitches as follows: Knit

in ribbing of K. 2, P. 2. Work in ribbing until the ribbing measures 6 inches. Knit 2 together across the row. (21 stitches on the needle) Next row: K. 1, K. 2 together, K. across the row. Repeat this row until there are 5 stitches on the needle. Knit these 5 stitches for 5 inches. Next row: K. 1, K. 2 together, K. 2. K. 1, K. 2 together, K. 1. Knit one row and bind off. Sew up both ends of each slipper. When slippers are finished ties will tie over the instep. The slippers may be finished with a row of crochet in a contrasting color around the opening of the slippers. Use knitting worsted or equivalent yarn.

RIBBED NO-HEEL SOCKS

Material: 1 4 oz. skein of knitting worsted 1 pr. No. 8 knitting needles
Starting at cuff edge, cast on 32 stitches loosely. Work in ribbing of knit 2 stitches, purl 2 stitches for 18 inches. Next row: *knit 2 st. together, P 2 st. together and repeat from * across the row. 16 st. remain. Break the yarn, leaving a strand about a yard long. Draw the yarn through the st. on the needle to form a ring, then draw yarn through same st. again to reinforce. Fasten securely and sew up the back of the sock. Make second sock the same way.

GARTER STITCH SCARF AND PONY TAIL HAT

Material: 1 4 oz. skein of knitting worsted makes scarf and hat. 1 pr. size 8 knitting needles.

SCARF: Cast on 24 stitches. Work in garter stitch as follows:

Row 1 --- knit 24

Row 2 --- knit 24

Row 3 --- (short row) --- knit 16, leaving 8 st. unworked

Row 4 --- (short row) --- knit 16

Repeat these 4 rows for pattern until there are 102 ridges (204 rows) of long rows.
Bind off. Sew 2 buttons on the scarf about 2 1/2 and 4 inches from one end. Button scarf through eyelets.

HAT: Cast on 44 stitches. Work in garter stitch as follows:

Row 1 --- knit 44

Row 2 --- knit 44

Row 3 --- (short row) knit 36, turn, leaving 8 st. unworked

Row 4 --- (short row) knit 36

Repeat these 4 rows for pattern, until there are 54 ridges (108 rows) of long rows.

Bind off. Sew bound off and cast on edges together. Turn up 3 inches at lower edge for cuff.

POMPONS

Cut 2 round cardboard discs the desired size. 2 1/2 inches in diameter makes a medium sized pompon. Use larger circles for larger pompons. Cut to a 1/4 to 1/2 inch hole in the middle. Thread a tapestry needle with yarn and cover the discs, by going through the center hole and over the edge of the circle. After the discs are completely covered and the center hole completely filled, slip the scissors between the discs and cut all threads at the outside edge. Wind a thread several times between the discs, leaving the ends long enough to join the pompon and the article. Remove cardboard. Trim the pompon. To make the pompon very fuzzy, place the finished pompon on the end of a table fork, and hold it over a steam kettle, keep turning the pompon until it is moist and fuzzy. Be careful not to burn yourself.

General Objectives:

1. to develop gains in physical well-being
2. to develop emotional gains and stability
3. to develop and progress towards greater degrees of social independence
4. to develop gains in intellectual advancement

APPENDIX

The lesson plans and units* included in this Appendix represent the work of trainees who were enrolled in the Institutes in the three summer sessions of 1969, 1970, and 1971. Some of these materials have been designed by individuals; others are the results of group effort. Each suggested activity or plan has been used successfully with trainable children. This selection of materials should not be considered to be exhaustive but viewed rather as a springboard to new, practical, and realistic approaches to learning.

*In many of these samples, the letters P (Primary), I (Intermediate), and A (Advanced) are used to denote the functioning levels of the children for which the various activities are suggested.

General Objective: To have the children learn how to use the telephone correctly.

Specific Objectives: (according to level)

- I. Primary level: Say hello and indicate that they will get their mothers to come to the phone.
- II. Intermediate level: Know their own telephone numbers.
- III. Advanced level: Know how to place an emergency phone call.

TEACHER	CHILDREN	TEACHER AIDE	MATERIALS
Read the story, <u>Tommy and the Telephone</u>	Children are sitting in the story circle, smaller ones on the floor and larger ones on the chairs.	She is sitting in the back, behind the circle (keeping an eye on the group)	The book; <u>Tommy and the Telephone</u>
Questions to ask after the story: 1. Do you have a phone at home? 2. Do you ever make phone calls? 3. What do you say when you answer the phone? 4. Do you know your own telephone number?	Children are still in the circle.	She remains with the group	Picture of a telephone
The teacher asks various children to come up and use the phone * questions on next page	Children come up to the front when the teacher calls on them	She has gotten the materials together	Two toy telephones Large cards with the more advanced child's phone number on it.

* The questions will be different for each level. This activity can still be done with the entire group, with different questions being asked.

I. Primary level:

What would you say if I called you on the telephone? Take this telephone and I will call you on my telephone. When you hear it ring, you answer the phone.

(The teacher has a bell which she rings to imitate the ringing of the phone. With the primary level child, the teacher is only interested in the response, hello. Later, the child may learn to say hello and indicate that he will get his mother to come to the phone.)

II. Intermediate level:

Can you come to the front and dial your own telephone number?

(If the child does not know his telephone number, but does know how to read numbers, let him read his phone number from a large printed card and then dial the number).

III. Advanced level:

Pretend you are calling the fire house to say that there is a fire in your garage. I will be the fireman, you call me.

(Teacher is checking to see if the child can give the nature of the problem, his name and his address).

These questions are only asked to a few children, not to each child. This gives the children an idea of what they are to do when they break up into groups. This also gives the teacher aide an idea of how to ask the question to the group she is assigned to help.

TEACHER	CHILDREN	TEACHER AIDE	MATERIALS
The teacher tells the children to go to their groups	The children divide into their groups according to their levels.	She will help to see that the children divide into the groups correctly.	Materials for each group are at their tables
The teacher will give the directions to the second group, and also the primary group. When both groups begin to work, she goes between the two groups when help is needed.	Level I They are working on a color sheet of the telephone.		Color sheet of the telephone, crayons
	Level II They are practicing their telephone numbers, with either dittos for tracing or anagrams.		Dittos for tracing child's phone number and anagrams of the phone numbers for each child
	Level III They are making tin-can telephones, with which they will practice their emergency calls	She is supervising the making of tin-can telephones.	Two tin cans for every child in the group, string, etc.
Teacher teaches the entire group the song: "The Telephone Song"	Children are back in the story circle.	She also sings with the group.	The song: "The Telephone Song"

TEACHER	CHILDREN	TEACHER AIDE	MATERIALS
The teacher gives directions for making a scrapbook. The class is to look in magazines for picture of and about telephone.	The children are at their desks looking through magazines.	The aide is helping the younger child to locate and cut the pictures.	A magazine for every child and a pair of scissors for every child.
The teacher may instruct the older students to help the younger ones.	Primary and some intermediates: They will cut the pictures from the magazines	She will help the younger ones again.	
	Some intermediates and the advanced: They may do some of the lettering for the scrapbook		Paper and pencils for the lettering.
